

Tackifier 70

Description

TACKIFIER 70 is an APEO free acrylic emulsion.
Tg = -45°C (approx).

Application

TACKIFIER 70 is used as tackifier/plasticizer in the production of water based pressure-sensitive adhesives.

Technical Specifications

Method of analysis	UoM	Standard
Solvents		water

Handling

The quantity of TACKIFIER 70 depends upon the peel adhesion value required; we recommend not to exceed 10-15%. Before adding the TACKIFIER 70, verify that pH value is around 7. TACKIFIER 70 must be added while stirring.

Packaging

The product is supplied in iron drums (200 kg); IBC containers (1050 kg).

Storing

Store the product at temperatures between +5 and +40°C. Keep the containers well closed to avoid skin formation. Stir well before use.

Protect from freezing.

Use within 12 months from production date (unopened and in the original packaging).
